

Federal Judicial Center - Songer Merge File for U.S. District Court Judges¹

This file contains data to merge biographical data on U.S. District Court judges from the Federal Judicial Center (FJC, <http://www.fjc.gov/history/home.nsf/page/judges.html>)² with data from the Songer et al NSF data base on cases (Songer, Kuersten and Haire, 2007) (<http://www.wmich.edu/nsf-coa/>). Because it includes the unique judge identifier codes used by both data sets, using this file will enable the user to merge the extant FJC data the Songer case-by-case data easily. This file can also be used to merge with the (Zuk, Barrow and Gryski, 2009) et al database on judicial attributes (currently found at (<http://www.cas.sc.edu/poli/juri/attributes.htm>), although the FJC contains much of the same information as the Zuk et al database.

The variables included in this dataset are:

- **Songer.Code** - Code assigned to a judge by the Songer et al team in its coding of cases. Used subsequently by the Zuk et al data. Can be used to merge.
- **Judge.Identification.Number** - Unique code assigned to a judge by the FJC. Can be used to merge.
- **Judge.Last.Name** - Judge's last name
- **Judge.First.Name** - Judge's first name
- **Judge.Middle.Name** - Judge's middle or, in some cases, middle initial
- **Suffix** - Name suffix, e.g., "Jr."
- **Court.Name** - Name of the court, e.g., "U. S. District Court, District of Massachusetts"
- **Court.Type** - Court type, e.g., "USDC" (United States District Court)
- **President.Name** - Name of appointing President
